

FOR IMMEDIATE RELEASE

Gary Kramer Releases the Tomcat Guitar, the Newest Version of the American Delta Wing Guitar Series

Tomcat Is the Ultimate Guitar For Its New Ergonomic Contour, DiMarzio Pickups and Delta Wing's Patented "Recessed Tuning" System

Los Angeles, CA-June 22-Enter the New Millennium. Gary Kramer is once again "Breaking The Sound Barrier" to bring musicians a superior instrument. Gary Kramer Guitars is proud to announce the new "Tomcat" version of the American Delta Wing guitar series. Reinventing a new era in sound and aesthetics, the new "Tomcat" will change the way musicians look at guitars.

Delta Wing instruments feature a radically different design philosophy that will revolutionize the future of guitar playing.

Stepping away from traditional body shapes, the new bold dynamic contours were carefully developed for their maximum ergonomics. Being a sonically versatile workstation, the "Tomcat" is loaded with DiMarzio pickups that are wired through a passive EQ "fire button" and variable coil splitting stage. Through the Delta Wing's patented "recessed tuning" system, the "Tomcat" captures both engineering and sound improvements that help the instrument resonate through the neck and body more efficiently, thus improving overall tone and sustain. All Delta Wing guitars reflect Gary Kramer's vision of perfectly balanced instruments and unequalled commitment to the finest guitar crafting while implementing modern ideas.

Gary Kramer is known for his pioneering guitar designs with Travis Bean and of course, the infamous Kramer Guitar Company. Kramer Guitars attracted a loyal list of musicians including Keith Richards, Stanley Clark, Gene Simmons, Jerry Garcia, Richie Sambora, Reb Beach, Vivian Campbell, Stanley Jordan, Eddie Van Halen and many, many more.

Teamed with Leo Scola to present a radical new design, Gary Kramer Guitars is proud to present an evolved instrument with a twist of the 21<sup>st</sup> century. Join the list of celebrated guitarists who have taken the leap forward with Gary Kramer and his innovations in musical instrument design.

"Guitarists have resisted change, until change became irresistible"- Gary Kramer 2006
